

Weekly Development Report 2 (9/11 - 9/17)

This is the 1st Weekly Development Report. This report summarizes the work completed from **Sunday, 11 September, to Saturday, 17 September**.

1. Group

As a group, we accomplished two main tasks:

- Initial development environment setup
 - Issue tracking with Jira
 - Git repository
 - Created rough sprint schedule
 - Created stories and assigned them to our sprints
- Worked on our individual revisions of lab 1

2. Individual

2.1. Carlo Diaz

I set up the Jira project to have issue tracking and met with the team to create our issues and sprints. I also completed my draft of section 4 while reviewing the comments made on my lab 1 revision 1.

2.2. Spencer Hite

2.3. Paolo Ihde

I helped sort the user stories into their respective sprints and worked with the team to setup our jira board. I used the comments from my previous lab 1 revision to improve my latest draft and I worked on the section 4 draft.

2.4. Brandon Kidd

Worked on Lab 1 section 4 draft and suggested revisions. Met with the team to work on user stories, sprints, and discuss our prototype components.

2.5. Autumn Roberts

This week I worked on the third lab revision, particularly section 4. We also met as a group to assign user stories to sprints and begin the structure of our development.

2.6. Michael Thompson

I helped the team group together user stories into specific sprints. I have made the necessary edits to Lab 1 as suggested by Mr. Brunelle, along with a rough draft of section 4.

2.7. Tobin Zheng

Assisted the team with grouping prototype user stories under planned future sprints, and cooperated with Carlo in understanding Github integration within Jira issue tracking. Completed recommended revisions by Mr. Brunelle, and wrote a rough draft for section four on Lab 1.
