

Weekly Development Report 5 (10/02 - 10/08)

This is the 1st Weekly Development Report. This report summarizes the work completed from **Sunday, 2 October, to Saturday, 8 October**.

1. Group

Provided further action for setting up the full-stack Amplify application

- Our Amplify project now has a working frontend (with a URI for deployed source code) and backend

2. Individual

2.1. Carlo Diaz

Worked with Paolo and Brandon to help set up the frontend for Amplify application.

Paolo and I decided on using the Amplify UI components rather than our Figma components for better flexibility and ease of use.

2.2. Spencer Hite

2.3. Paolo Ihde

Helped set up frontend for the prototype in the repository and Amplify application. Set up SSH keys to use with Github account. Researched various UI component libraries that could be used in our prototype.

2.4. Brandon Kidd

Worked with Paolo and Carlo to connect the frontend to backend environment through AWS Amplify. Connected to our team Repo. Started Database development.

2.5. Autumn Roberts

I worked with Paolo and Carlo to get connected to the repository and researched amplify and its various UI libraries that would be useful for the signup page for Art Guardian.

2.6. Michael Thompson

I set up my programming environment which included the installation of Ubuntu onto windows via WSL and the installation of python.

2.7. Tobin Zheng

Greatly expanded the backend development documentation with research concerning the image matcher. Cooperated with Michael to set up the python development environment in WSL and configure VScode accordingly.
