

Weekly Development Report 1 (9/4 - 9/10)

This is the 1st Weekly Development Report. This report summarizes the work completed from **Sunday, 4 September, to Saturday, 10 September**.

1. Group

Three major tasks initiated:

- We met for the first time since CS410 and discussed team scheduling, initial tasks, and setup for CS411W
- We negotiated a good time to meet with the professor on a weekly basis
- We brushed up on our prototype definition and reviewed our individual Lab 1s

2. Individual

2.1. Carlo Diaz

I read over the professor's comments on my individual Lab 1 Revision 2. I began working on assessing those comments from sections 1-3, and I expect to begin working on a draft for section 4 next week. I worked on getting the Team Blue website accessible through the correct url (cs.odu.edu/~cs411blue).

2.2. Spencer Hite

I received the Professor's email of my individual lab revision and have begun working on how to better assess his comments for sections one through three and am currently drafting section four. We've also created our official group GitHub and will continue committing changes as the semester progresses.

2.3. Paolo Ihde

I reviewed the recommended revisions from the professor for my Lab 1, and I have started on a new version with the revisions from sections 1-3. I thought about what I will include in section 4, and I'll begin writing a detailed outline so that I can start the draft. I researched more about the frontend technologies we will be using.

2.4. Brandon Kidd

This past week I went over our past design/prototype plans from CS410 to confirm and refresh myself on aspects of our project. I've reviewed the Lab 1 that was returned to us this week and started revisioning it as suggested. I did research on different AWS cloud infrastructures and AWS cloud databases to see what services/databases may suit our project prototype best.

2.5. Autumn Roberts

This past week I reviewed my lab 1 submission from cs410. I have started the process of making edits and resolving any comments made and will soon begin my section 4 draft. I have also been thinking about our team's sprints and what the development will look like in the upcoming weeks.

2.6. Michael Thompson

This past week I helped set up the google drive folder my team will use to store documents for our prototype. I have reviewed the Lab 1 draft comments by Professor Brunelle. I am planning to make the necessary edits and write out section 4 of lab 1 in the upcoming week.

2.7. Tobin Zheng

This past week, I met up with Michael to create the project's Github account. I also pulled and stood up our project's website from CS410. Finally, I looked through my Lab 1 submission that was reviewed and commented on by Professor Brunelle, and started planning my revisions.
