Weekly Development Report 3 (9/18 - 9/25)

This is the 1st Weekly Development Report. This report summarizes the work completed from **Sunday, 18 September, to Saturday, 25 September**.

1.   Group

As a group, we accomplished:

- Setting up our individual development environments
    - Cloning the github repo into our machines
    - Creating file tree
- Modify backlog and adjust sprints based on resources/scheduling changes
- Began setting up databases and AWS services

2.   Individual

2.1. Carlo Diaz

Created epics and assigned small subtasks to the respective epics. Set up my development environment to be consistent with the tools utilized for the team, including specific tool versions.

2.2. Spencer Hite

2.3. Paolo Ihde

I helped create the demo presentation, and I setup my development environment using Node.js and WSL. I helped sort the user stories into sprints in the jira board. I did some research into AWS Amplify which could be used to create our backend API.

2.4. Brandon Kidd

Met with the team to set up our development environments. Added Database specific stories to our Jira board. Helped create our demo presentation. Researched AWS cloud database and hosting services to better understand services we plan to use for our prototype.

2.5. Autumn Roberts

This week I set up my development environment and mapped user stories to features. I also researched the basics of UI/UX development as it is something I have never done before.

2.6. Michael Thompson

I helped with adjustments towards the Prototype Demo #1 presentation. I also helped with rearranging the sprint plans and I set up my programming environment.

2.7. Tobin Zheng

Directed the team in setting up their development environments and also helped create the Prototype Demo #1 presentation. Assisted with mapping user stories to features and adjustments to sprint plans, and maintained the website.
